2020

**PATC Systems Workshop: Programming
MareNostrum4**

Index

- **Introduction**
 - Why containers in HPC
 - Introducing singularity
- **Availability in BSC machines**
- **How to:**
 - Execute
 - Build
 - Path binding
 - MPI
- **Questions**

Introduction to Singularity

**Barcelona
Supercomputing
Center**
Centro Nacional de Supercomputación

Why containers?

After 1 week...

... stuff to install:

20191024

AN/4.0

H/1.0

.1

.2

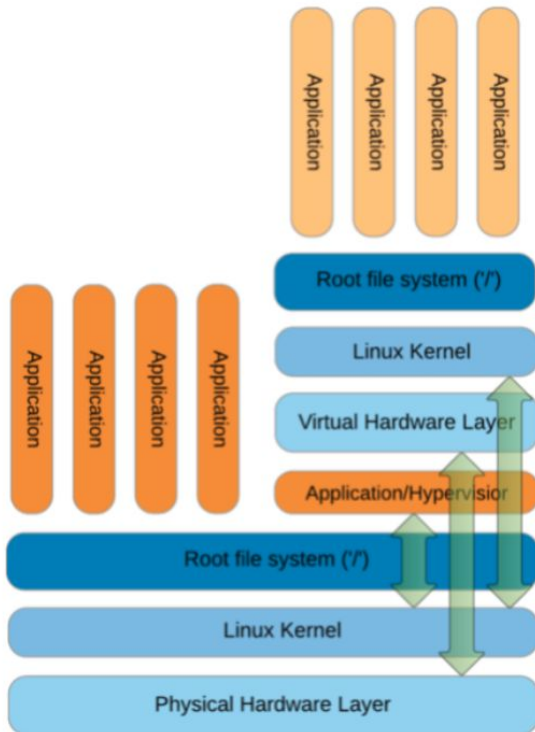

Support guy:

Finally after a week of h
and running for you.

And.. could you ..

Introducing Singularity

Virtual Machine

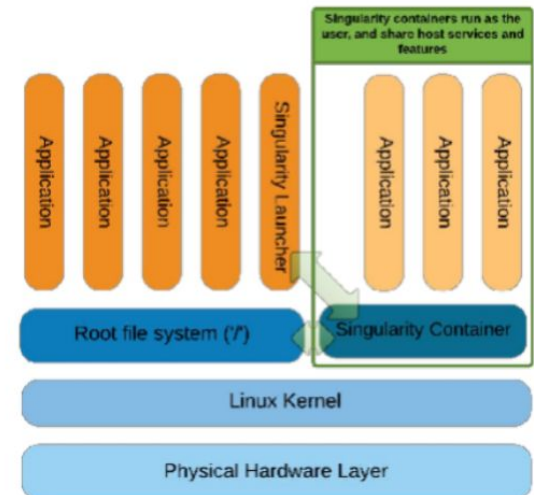

Docker

- Independent namespaces
- Root supported contexts

Singularity

- Host services and devices shared
- User access

[From] Arango, Carlos et al. "Performance Evaluation of Container-based Virtualization for High Performance Computing Environments." *ArXiv abs/1709.10140* (2017): n. pag.

Introducing Singularity

- **Container:**

File containing all software and dependencies needed to run your applications.

- **Container platform:**

Run				Marenostrum4
Build	+	Containers	at	Nord3
Edit				Minotauro
			

- **Not ideal : Architecture dependant**
X86 container do not run at Power9

Availability and usage

**Barcelona
Supercomputing
Center**

Centro Nacional de Supercomputación

Availability at BSC

Marenosturm4

x86_64 General purpose cluster. 48 core per Node

\$ module load singularity/3.5.2

Availability at BSC

Marenosturm4 **CTE-Power9**

PPC architecture + 4x nvidia volta (v100) GPUs

\$ module load singularity/3.4.1

Availability at BSC

Marenostrum4

CTE-Power9

Nord3

x86_64 General purpose cluster. 16 core per Node

\$ module load SINGULARITY/3.2.0

Availability at BSC

Marenostrum4

CTE-Power9

Nord3

Minotauro

x86_64 16 cores per Node + 4 x Nvidia tesla (K80) GPUs

\$ module load SINGULARITY/2.5.1

How to...

**Barcelona
Supercomputing
Center**

Centro Nacional de Supercomputación

How to... Execute

- **Singularity run**

Runs container default command

Only one command may be specified by container

- *Usage: (assume our container is called demo.sif)*

\$ singularity run demo.sif

```
~/lolcow/SingularityHandsOn$ singularity run PATC.sif
```

```
/ You will feel hungry again in another \  
 \ hour. \  
-----
```

```
 \ ^ ^  
  (oo)\_____  
  ( _)\      )\\\  
   ||-----w||  
   ||         ||
```

□

How to... Execute

- **Singularity exec**

Allows to run any command/software/tool

It must be available within the container

- *Usage:*

\$ singularity exec demo.sif "command"

```
~/lolcow/SingularityHandsOn$ singularity exec PATC.sif cowsay "Kill me pls :)"
```

```
< Kill me pls :) >
```

```
-----  
 \      ^__^  
  (oo)\_____  
     (__)\       )\/\  
        ||----w |  
        ||     ||
```

└

How to... Execute

- **Singularity shell**

Shell into the container environment

Inspect/Modify the container interactively

- *Usage:*

\$ singularity shell demo.sif

How to... Execute

- Singularity shell

```
~/lolcow/SingularityHandsOn$ cat /etc/os-release
NAME="Ubuntu"
VERSION="18.04.4 LTS (Bionic Beaver)"
ID=ubuntu
ID_LIKE=debian
PRETTY_NAME="Ubuntu 18.04.4 LTS"
VERSION_ID="18.04"
HOME_URL="https://www.ubuntu.com/"
SUPPORT_URL="https://help.ubuntu.com/"
BUG_REPORT_URL="https://bugs.launchpad.net/ubuntu/"
PRIVACY_POLICY_URL="https://www.ubuntu.com/legal/terms-and-policies/privacy-policy"
VERSION_CODENAME=bionic
UBUNTU_CODENAME=bionic

~/lolcow/SingularityHandsOn$ singularity shell PATC.sif
Singularity PATC.sif:~/lolcow/SingularityHandsOn> cat /etc/os-release
NAME="Ubuntu"
VERSION="14.04.5 LTS, Trusty Tahr"
ID=ubuntu
ID_LIKE=debian
PRETTY_NAME="Ubuntu 14.04.5 LTS"
VERSION_ID="14.04"
HOME_URL="http://www.ubuntu.com/"
SUPPORT_URL="http://help.ubuntu.com/"
BUG_REPORT_URL="http://bugs.launchpad.net/ubuntu/"
Singularity PATC.sif:~/lolcow/SingularityHandsOn> □
```

How to... Create

- Singularity build

Allows building of images from different sources:

- URI beginning with **library://** to build from the Container Library
- URI beginning with **docker://** to build from Docker Hub
- URI beginning with **shub://** to build from Singularity Hub
- path to a **existing container** on your local machine
- path to a **directory** to build from a sandbox
- path to a Singularity definition file

How to... Create

- **Singularity build (Use cases)**

Building from dockerhub - immutable container

```
$ singularity build test.sif docker://ubuntu
```

Building from dockerhub - editable container

```
$ singularity build --sandbox test docker://ubuntu
```

Editable from immutable and vice versa

```
$ singularity build --sandbox test test.sif
```

How to... Create

- Singularity build (Use cases)

Building from definition file

```
Bootstrap: library
From: ubuntu:14.04

%post
    apt-get -y update
    apt-get -y install fortune cowsay lolcat

%environment
    export LC_ALL=C
    export PATH=/usr/games:$PATH

%runscript
    fortune | cowsay | lolcat
```

*\$ **sudo** singularity build test.sif DEFINITION_FILE*

Warn: Build from scratch may require root privileges

How to... Create

- **Singularity and docker**

If it is on dockerhub:

```
$ singularity build test.sif docker://ubuntu
```

Converting local docker images to singularity:

`docker2singularity`

```
$ docker run quay.io/singularity/docker2singularity
```

Info: <https://github.com/singularityhub/docker2singularity>

How to... Edit

- **Modify container content (--writable)**

Install new tools, modify config files...

\$ singularity shell --writable test

Tips:

Preferably to be run with root permission

\$ sudo singularity shell --writable test

Container must be in sandbox mode

\$ sudo singularity build --sandbox test test.sif

\$ sudo singularity shell --writable test

How to... Edit

- Modify container environment

Set default environment variables

\$ sudo singularity shell --writable test

Edit the following file:

```
#!/bin/sh
#Custom environment shell code should follow
```

\$ vi /environment

```
export LC_ALL=C
export PATH=/usr/games:$PATH
```

We can configure our custom paths, as example:

export MY_APP_PATH=/apps/myAPP

How to... Bind

- **Bind container paths (--bind/-B)**

One path

```
$ singularity run -B /data:/mnt test.sif
```

Several paths “,” as separator

```
$ singularity run -B /opt,/data:/mnt test.sif
```

How to... Bind

- **Bind container paths (--bind/-B)**

One path

```
$ singularity run -B /data:/mnt test.sif
```

Several paths “,” as separator

```
$ sudo singularity run -B /opt,/data:/mnt test.sif
```

Tips:

Create bind directories inside container

```
$ sudo singularity exec --writable test mkdir /apps
```

```
$ singularity exec -B /apps test /apps/myapp
```

How to... MPI

- Running MPI applications

MPI in singularity is supposed to work seamlessly

Proved to work:

```
$ mpirun -np 4 singularity exec test.sif ./mpiapp
```

Don't usually work:

```
$ singularity exec test.sif mpirun -np 4 ./mpiapp
```

How to... MPI

- Running MPI applications

MPI in singularity is supposed to work seamlessly

Proved to work:

```
$ mpirun -np 4 singularity exec test.sif ./mpiapp
```

Tips:

Sometimes binding host MPI libraries improves compatibility with the site HPC network and libs

```
$ srun -B /usr/lib64:/usr/lib/singularity.d/libs \
singularity exec ./mpiapp test.sif
```

How to... MPI

- Jobscript example (MN4)

```
#!/bin/bash
```

```
#SBATCH --ntasks=96
```

```
#SBATCH --time=00:20:00
```

```
#SBATCH --job-name=mpi-test
```

```
#SBATCH --error=%j.err
```

```
#SBATCH --output=%j.out
```

```
module purge
```

```
module load gcc openmpi/3.1.1 singularity
```

```
mpirun singularity exec ~/MPI.sif mpi_hello_world
```

How to... GPUs

- **Running on GPUs (--nv)**

GPUs supported by default

How to... GPUs

- **Running on GPUs (--nv)**

GPUs supported by default

```
$ singularity exec --nv test.sif ./GPUapp
```

Cluster necessary libraries are mounted on the container to be used

Summary

When **to use** it

Testing

- Unstable releases
- Proof of concept executions
- Punctual data preproces

Reproducibility

- Complex software stacks

When **NOT to** use it

Production

- Architecture aware software

GROMACS, NAMD, CPMD...

- Frequent HPC applications

Not available soft?

- Request it to the support team
